

## **Nevada Life Science Standards 2004**

### **Life Science Concept B**

Grades K-2

L.2.B.

Students understand that living things have identifiable characteristics.

L.2.B.1 Students know that humans and other animals use their senses to know their world.

Grades 3-5

L.5.B

Students understand that living things have specialized structures that perform a variety of life functions.

L.5.B.1 Students know that plants and animals have structures that enable them to grow, reproduce, and survive.

### **Life Science Concept C: Organisms and their Environment**

Grades K-2

L.2.C

Students understand that living things live in different places.

L.2.C.1 Students know that plants and animals need certain resources for energy and growth.

L.2.C.2. Students know that a habitat includes food, water, shelter and space.

L.2.C.3 Students know that living things are found everywhere in the world.

### **Life Science Concept D: Diversity of Life**

Grades K-2

L.2.D

Students understand that there are many kinds of living things on earth.

L.2.D.1 Students know plants and animals can be sorted by observable characteristics and behaviors.

Grades 3-5

L.5.D

Students understand that living things can be classified according to physical characteristics, behaviors, and habitats.

L.5.D.1 Students know plants and animals can be classified according to their observable characteristics.
